MEMBER BILLING ACKNOWLEDGMENT

Chiropractic

For questions, please call ASH at 800.972.4226

IMPORTANT NOTICE: You may have additional coverage options for these services through your medical insurance benefits. ASH recommends that you contact your health plan to inquire regarding coverage for these services prior to signing this form.

I, _____ (Name of Patient/Member/Subscriber), a member being treated by Dr. _____ (Chiropractor Name),

do hereby acknowledge that a certain portion of my care will not be covered by my HMO, insurance company, or health plan under the terms of my Benefit Plan with _____ (Name of Health Plan).

I understand and agree to be responsible to self-pay for the following services:

LIST OF SERVICES TO BE PAID FOR BY MEMBER:

Date	Procedure	Charge
	Electrical Stimulation	$ 10.00
	Rapid Release/Ultrasound Vibration	$ 10.00
	Flexion Distraction	$ 10.00
	Massage	$ 80/ Hr. 45/ Half Hr.
	Athletic Taping	$ 10.00
	Nutritional Consult	$ 50.00

Separately list each date of service on which non-covered services will be rendered and have the member initial the charge. Please attach additional Member Billing Acknowledgment form(s) for additional services.

This form is only to be used if an ASH member desires to self-pay for non-covered services. Non-covered services include services such as supplements that are not covered by the member's health plan. Non-covered services may also include services determined by ASH to be maintenance-type services.

The ASH Contracted Chiropractor may not bill the member during the course of an ASH approved treatment program unless there is a copayment, deductible, coinsurance, or the member is receiving non-covered services.

The ASH Contracted Chiropractor may not bill the member for the difference between what the ASH Contracted Chiropractor bills and what the ASH Contracted Chiropractor agreed contractually to accept as payment for services. This difference represents an amount the ASH Contracted Chiropractor agreed contractually to waive.

This agreement may not be used as a "blanket" or "retroactive" agreement to bill members for any services not reimbursed by ASH. Such use will render this agreement "void" and non-binding on the Member. This agreement may only be used to allow the member to agree to "self pay" for specific services **in advance**.

I acknowledge that I have reviewed my coverage options and that I have been told in advance of treatment what portion of my care I will have to pay for, including non-covered services as described above, and agree to make financial arrangements with my chiropractor,

Dr. _____ (Chiropractor Name), to pay for these services myself.

The doctor of chiropractic evaluates the patient using standard examination and testing procedures. A chiropractic adjustment involves the application of a quick, precise force directed over a very short distance to a specific vertebra or bone. There are a number of different techniques that may be used to deliver the adjustment, some of which utilize specially designed equipment. Adjustments are usually performed by hand but may also be performed by hand-guided instruments. In addition to adjustments, other treatments used by chiropractors include physical therapy modalities (heat, ice, ultrasound, soft-tissue manipulation), nutritional recommendations and rehabilitative procedures.

Chiropractic treatments are one of the safest interventions available to the public demonstrated through various clinical trials and indirectly reflected by the low malpractice insurance paid by chiropractors. While there are risks involved with treatment, these are seldom great enough to contraindicate care. Referral for further diagnosis or management to a medical physician or other health care provider will be suggested based on history and examination findings.

Listed below are summaries of both common and rare side-effects/complications associated with chiropractic care:

Common [1, 2]

- Reactions most commonly reported are local soreness/discomfort (53%), headaches (12%), tiredness (11%), radiating discomfort (10%), dizziness, the vast majority of which resolve within 48 hours

Rare [3, 4]

- Fractures or joint injuries in isolated cases with underlying physical defects, deformities or pathologies
- Physiotherapy burns due to some therapies
- Disc herniations
- Cauda Equina Syndrome [2] (1 case per 100 million adjustments)
- Compromise of the vertebrobasilar artery (i.e. stroke) (range: 1 case per 400,000 to 1 million cervical spine adjustments [manipulations]). This associated risk is also found with consulting a medical doctor for patients under the age of 45 and is higher for those older than 45 when seeing a medical doctor.

Please indicate to your doctor if you have headache or neck pain that is the worst you have every felt[3]

I understand that there are beneficial effects associated with these treatment procedures including decreased pain, improved mobility and function, and reduced muscle spasm. I also understand that my condition may worsen and referral may be necessary if a course of chiropractic care does not help or improve my condition.

Reasonable alternatives to these procedures have been explained to me including prescription medications, over-the-counter medications, possible surgery, and non-treatment. Listed below are summaries of concern with the associated alternative procedures.

- Long-term use or overuse of medication carries some risk of dependency with the use of pain medication the risk of gastrointestinal bleeding among other risks
- Surgical risks may include unsuccessful outcome, complications such as infection, pain, reactions to anesthesia, and prolonged recovery[5].
- Potential risks of refusing or neglecting care may result in increased pain, restricted motion, increased inflammation, and worsening of my condition[6]

Neck and back pain generally improve in time, however, recurrence is common. Remaining active and positive improve your chances of recovery.
